WARNING. Contains a substance known to the State of California to cause cancer. Quartz is classified by IARC (International Agency for Research on Cancer) as carcinogenic to humans by inhalation (Group I). Furthermore, quartz can cause silicosis, lung cancer and other lung diseases on prolonged exposure.

Kaolin clay may contain up to 2% quartz which is part of the natural raw material as mined.

Contains ~1% naturally occurring quartz that is bound in the product matrix reducing free respirable crystalline silica to <0.1%.

Occupational exposure limits to respirable crystalline silica are not expected to be exceeded during normal, foreseeable conditions of fresh product use, as recommended by GRACE. Exposure to respirable dust and respirable crystalline silica should be monitored and controlled during other conditions.
